WHAT IS SO DIFFERENT?

- ✅ Training from IT company with 6 months exp letters
- ✅ AI ATS resume builder
- ✅ Unlimited AI Mock interviews with feedback
- ✅ Unlimited job offers until you're placed
- ✅ Guaranteed 1st round interviews
- ✅ Medical plan + doctor calls — up to ₹1 lakh coverage!

SOFTWARE TESTING
SYLLABUS

Testing Basics

- ·Use terminal commands: cd, ls, mkdir, touch, rm, grep, and le navigation.
- ·Resolve a domain name (e.g., google.com) to its IP address using nslookup or dig.
- ·Inspect HTTPS certicates in Chrome/Firefox and identify expiration dates.
- ·Open browser DevTools and modify the text/content of a live webpage element.
- ·Use the Network tab to capture API calls made by a webpage and analyze headers.
- ·Debug JavaScript errors in the Console tab of DevTools.

Manual Testing

- ·Write test cases for a login page (valid/invalid credentials, password reset).
- ·Log a defect with steps to reproduce, screenshots, and environment details
- (browser/OS).
- ·Perform exploratory testing on a demo website (e.g., saucedemo.com) and report 3 bugs.
- ·Create a test plan for a sample application (e.g., e-commerce checkout ow).
- ·Execute regression testing on a new build and compare results with previous builds

Testing Techniques

- ·Test a number input eld (e.g., age) with boundary values (min-1, min, max, max+1).
- ·Use equivalence partitioning to group test inputs for a "discount coupon" eld.
- ·Create a decision table for a login feature (valid/invalid username, valid/invalid
- password).
- ·Perform negative testing on a form (e.g., invalid email formats, empty elds).
- ·Write test cases for a search feature (e.g., partial matches, special characters)

HTML/CSS/JS for Testing

- Write an HTML page with a form containing text elds, radio buttons, and a submit button.
- Identify elements on a webpage using Chrome DevTools (IDs, classes, data-testid).
- Write CSS selectors to target nested elements (e.g., div.container > button.primary).
- Selenium Testing Java Topics
- Use Flexbox to create a horizontal navigation menu with 5 links.
- Add a media query to hide an element on mobile screens (max-width: 768px).
- Debug a JavaScript function in the browser console (e.g., form validation).

Core Java for Automation

- ·Write a Java program to read test data from a CSV le.
- ·Create a class with methods to handle le I/O (e.g., reading cong les).
- ·Use try-catch blocks to handle exceptions in test scripts.
- ·Implement OOP concepts: create a User class with elds (name, email) and methods.
- ·Use collections (e.g., ArrayList, HashMap) to store and manipulate test data.
- ·Write a program to sort a list of integers using streams and lambdas.

SQL for Testers

- ·Write a SELECT query with WHERE, JOIN, and GROUP BY clauses.
- ·Validate database entries after UI actions (e.g., user registration).
- ·Test stored procedures and triggers for data integrity.
- ·Use INSERT, UPDATE, and DELETE to modify test data in a database.
- ·Write a query to nd duplicate records in a table.

Selenium Java Testing

- Install Java JDK and set up the environment (set JAVA_HOME).
- Add Selenium WebDriver dependencies using Maven (pom.xml).

- ·Write a script to open Chrome/Firefox, navigate to a URL, and close the browser.
- .Use XPath and CSS selectors to locate dynamic elements.
- ·Handle dropdowns, radio buttons, and checkboxes using Selenium.
- ·Use WebDriverWait to handle dynamic content and AJAX calls.
- ·Implement the Page Object Model (POM) for maintainable test scripts.
- ·Run tests in parallel using TestNG and Selenium Grid.
- .Capture screenshots on test failure and attach them to reports.

.

REST API & JWT Auth

- ·Send GET/POST requests to a public API using Postman.
- ·Validate API responses (status codes, headers, JSON body).
- ·Test authenticated endpoints using JWT tokens in headers.
- ·Write a Java program to generate and verify JWT tokens.
- ·Use RestAssured to automate API tests in Java.

Postman (API Testing)

- ·Create a Postman collection for an e-commerce API (e.g., add to cart, checkout).
- ·Write pre-request scripts to generate dynamic data (e.g., timestamps).
- ·Automate API tests with the Collection Runner.

- ·Use environment variables in Postman for different test environments.
- ·Validate API responses using Postman's test scripts (e.g., pm.response.code === 200).

Cucumber (BDD)

- ·Write a feature le with scenarios for a login feature.
- ·Implement step denitions in Java to map Gherkin steps to code.
- ·Generate HTML reports with Cucumber.
- ·Integrate Cucumber with Selenium for behavior-driven test automation.
- ·Use tags in Cucumber to group and run specic scenarios.

Git & GitHub

- ·Clone a repository, create a branch for test scripts, and push changes.
- ·Resolve merge conicts between main and feature/login-tests branches.
- ·Use .gitignore to exclude temporary les (e.g., logs, screenshots).
- ·Create a pull request (PR) and review changes in GitHub.
- ·Use GitHub Actions to automate test execution on every commit.

Integration Tasks

- ·68.Combine Selenium and API tests to validate end-to-end ows (e.g., user signs up via UI,
- API veries DB entry).
- ·69.Run Cucumber tests through Jenkins with parallel execution.
- ·7O.Integrate with cloud platforms (BrowserStack, Sauce Labs) for testing on multiple
- devices.

ON THE JOB LEARNING:

Get On The Job Training through live projects of IT Companies that build confidence & reinforce learning with real-world applications of the tech stack

Appteknow Careers
Your Job Our Success

YOU WILL GET:

6 months experience certificates Interviews till the placement AI tools for Mock Interviews & English Pay upto 75% fee after the placement
